Gro Brundtland Week

Women in Sustainable Development

20-26 February 2016

February 24 | National Dong Hwa University, Hualien | 10:00-11:30

Deep Decarbonization in Taiwan

YUAN-TSEH LEE, Academia Sinica, Taipei, Taiwan

Prof. Lee is an alumnus of the University of California, Berkeley and was previously on the UC Berkeley faculty in the Department of Chemistry. Together with Dudley Herschbach and John Polanyi, he received a Nobel Prize in Chemistry in 1986 for their studies on the dynamics of fundamental chemical processes. Professor Lee left for Taipei in 1994 to be the President of Academia Sinica, the highest academic institution in Taiwan. Since 2006, he becomes the President Emeritus and Distinguished Research Fellow at the same institution.

February 25 | Academia Sinica, Taipei | 13:00-14:30

Building Healthy Living Culture by all!

WEN-HARN PAN, Academia Sinica, Taipei, Taiwan

Prof. Pan holds the Ph.D. degree in Nutrition Epidemiology from Cornell University. Her research contributions have been on dietary and genetic factors contributing to the development of cardiovascular diseases. She initiated a longitudinal community cohort study on cardiovascular disease development and led the Nutrition and Health Survey in Taiwan in the past 20 years. Currently, her research topics include hypertension and obesity genomics, metabolomics research of foods and metabolic diseases, dietary therapy, community-based health intervention and promotion. She received the Lifetime Achievement Award from Asia Pacific Clinical Nutrition Society in 2010 and the Outstanding Technology Contribution Award from Taiwan Executive Yuan in 2015.
